

Mobile Health Clinic powered by TELUS

Our mobile health clinic offers people easier access to health services when and where they need it. Our aim is to help those who face barriers accessing traditional medical care.

Our van has a reception area and a private area for examining and treating clients. We travel across the Fraser Health region to different locations throughout the week. Our hours vary during the day and evening, depending on the community.

In the clinic, we have a registered nurse, dental hygienist, and nurse practitioner. Together, we provide immediate access to care in these 3 areas:

Immunizations

We can immunize children of pre-school age who attend StrongStart BC.

Dental health

We can do any of these for you:

- Check teeth and gums.
- Teach you how to keep your teeth and gums healthy.
- Apply fluoride varnish.
- Help youth up to 19 years old get funding for dental care.

Testing and treatment

We can test and treat youth and adults for sexually transmitted and other blood borne infections.

Thanks to **TELUS** and the **Surrey Hospital Foundation** for their support!
